

DREAMBOX.COM

Parents can get a free 90 day membership for home use if you sign up by April 30. Dreambox is a fabulous online learning program focusing on number sense and conceptual learning which adapts to the individual child. The only complaint I have ever heard about it is the expense, and right now that's not a factor. It provides interactive instruction and assessment for kids at all elementary and middle school levels. It has both intervention and enrichment resources.

Zearn

According to Zearn's website "Thanks to donations, our entire K-5 curriculum – including 400 hours of digital lessons with on-screen teachers and supportive remediation – is available for free during this time. Kids, teachers, parents, and caregivers can directly access all our top-rated content 24/7, outside of school, including paper-based materials that can be used without a device. "

PBS Math Club

Humorous videos for upper elementary and middle school math topics. Their videos use math in real word contexts (for example teaching distributive property with friendship bracelets, and negative numbers with "thumbs down" on youtube).

MATHPLAYGROUND.COM

Many choices of free games, some are better than others. These won't generally lead to a deep understanding of math, but many are a great way to increase speed and fluency with facts.

Greg Tang Math

Online games for kids, word problem generator, free downloadable games and activities, and information on his books and speaking engagements

Math Cats

Creative, open ended math explorations for kids. This site has puzzles, magic squares, riddles, games, an elapsed time calculator, examples of mathematical art, ideas for crafts to make, and even a guide to starting your own math club, all with a cat theme!

PRODIGYGAME.COM -

Your child already has an account with this website. I have loaded some assignments to help them review. Most students LOVE this interactive website!!

No internet needed - fun math games
